

A PROJECT DELIVERY TEAM BUILT TO OVER-DELIVER.

Ulteig's Project Delivery Services (PDS) team thrives to be widely regarded as the partner of choice for technical and professional services solutions. We leverage our industry experience, relationships, tools and processes to enhance and support client teams throughout the duration of a client's project.

WHEN YOU CHOOSE ULTEIG, YOU GET A TEAM THAT IS KNOWN, EXPERIENCED AND TRUSTED.

YOUR PDS TEAM WILL:

- Manage projects, construction, or portfolios on behalf of the owner/developer at any point necessary during the process.
- Give our clients more than just "bodies," bringing Project Management Construction Management (PMCM) competency, strong experience, project expertise, credentials and resume to the table.
- Interface with the Owner/Developer's team and manage stakeholders as they would, from landowners and investors to local jurisdictions and internal team members.
- Align quality expectations with contractors early and often by benchmarking site activities.
- Provide real-time construction progress reporting using Ulteig GIS Dashboard.
- Care for the land like it is our own, by planning and sequencing to minimize disturbance.
- Plan for a successful project while continually identifying and mitigating risks.
- Be Owner/Developer's delivery-focused advocate – both in the field and behind the scenes.
- Be flexible and adaptable, accommodating staffing with our clients' needs and schedule.
- Provide in-house integration with engineering and field services – a one stop shop.
- Manage projects at any phase in the project life cycle as needed: from design through construction to Commercial Operation.

“ Ulteig and Northwestern Energy worked collaboratively to assess and develop a Project Management framework for our five-year portfolio of Transmission and Distribution capital projects. The PM expertise and experience Ulteig brought relating to project, program and portfolio management was critical for our success. Ulteig placed highly skilled PM professionals within our organization to work side-by-side with our internal team on critical infrastructure projects. ”

– Blain Nicholls

Project Management, Northwestern Energy

YOUR PDS TEAM

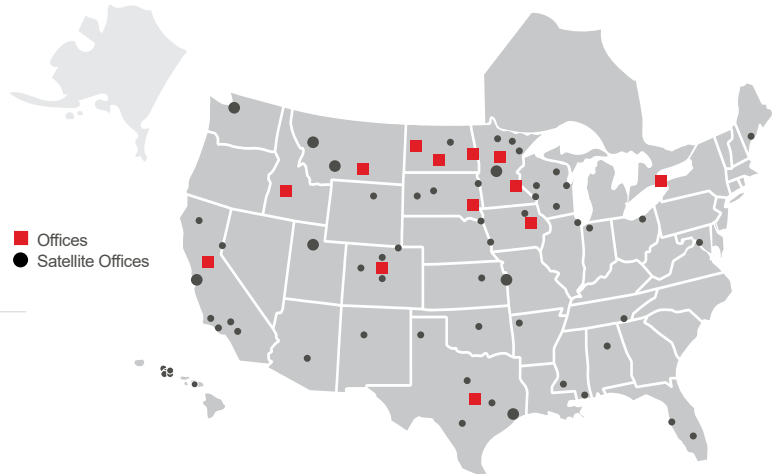

ULTEIG BY THE NUMBERS:

700+ employees  **35+** GW renewable projects

~\$1.5 BILLION
high voltage transmission capital projects currently in process

77 years of experience **14** dedicated offices **45+** satellite offices*

*including an office in Ontario, Canada.

The Ulteig PDS team excels at project and portfolio management, pre-construction strategy, key contractor management, indicative pricing and estimating, permitting and land control coordination, risk modeling and management, contractor bid review, construction management, scheduling and controlling, financial due diligence and budget management, procurement coordination, key stakeholder management, on-site quality management, document controlling and design process oversight.

THE PDS TEAM IS:

EXPERIENCED: We've worked with power and renewables clients from large to small, and can meet your needs, no matter the size.

RESPONSIVE: We work on a quick turnaround and over short time frames; we can jump into a project quickly.

SAFE: We are committed to safety and quality – always.

RESPECTED: We lean on our experience and reputation within the power and renewables industries.

“Our PDS team allows our clients to enhance their existing staff with the addition of our expert project managers, project coordinators, construction field resources and project controls specialists. This allows the client's project company to bridge any gaps in their project management resources and scale up to deliver more generation.”

– Nick Knezevich, Ulteig Project Management Supervisor
