

# ULTEIG COMPANY PROFILE

Ulteig

At Ulteig, we design, create and solve for a sustainable future, transforming our world's critical infrastructure through collaborative and innovative solutions across the Lifeline Sectors® of Power, Renewables, Transportation and Water. For over 75 years, we have leveraged our expertise to connect people and communities to today's needs and tomorrow's opportunities. Operating throughout North America, we serve a wide range of public and private clients as they address the demands for sustainable, adaptable and reliable infrastructure solutions, with an eye for what lies ahead.

To anticipate, adapt and exceed the diverse needs of our clients across sectors, we offer a full range of engineering design, program management and technical and field services.

Ulteig's earliest efforts focused on bringing electricity to rural North Dakota. Today, we have expanded to include 14 physical office locations across North America with a staff of more than 1000 professionals managing an average of 2000+ technical and field service projects annually.

In 2023, Ulteig ranked 125 in ENR's Top 500 Design Firms list and 15 in Zweig Group's Hot Firm List, honoring the 100 fastest growing architecture, engineering and construction (AEC) firms in the U.S.

As an employee-owned company, we work collaboratively with our teams to enrich our workplace culture, ensuring the best experience for clients and employees alike. We are proud of the numerous regional and national awards recognizing client projects, outstanding culture and the excellence of our professionals. A focus on flexibility, growth, wellbeing and safety are foundational reasons why we were ranked #14 on Glassdoor's national list of Best Places to Work in 2023.

From solar energy farms in Tennessee to helping municipalities modernize their grid, from highway design in Colorado to wastewater design for freeway rest areas in North Dakota, we create and solve for a sustainable future.
