

PINPOINT: PROJECT MANAGEMENT AT YOUR FINGERTIPS

PinPoint is a Geographical Information System curated by Ulteig to serve as a user-friendly database for infrastructure project management.

YOUR 'SOURCE-OF-TRUTH' TECHNOLOGY SOLUTION

PinPoint addresses several critical needs in the infrastructure engineering sector, including:

1. Optimized coordination in navigating complex, large-scale projects.
2. Data standardization across disciplines.
3. Improved monitoring of project scope.
4. Efficient communication among collaborating project leaders.

KEY FEATURES

1. **Big Data Management:** PinPoint easily integrates multiple data sets (both public and project-specific) into a single user-friendly interface.
2. **Data Visualization:** Software provides immediate access to project data to help navigate and identify constraints.
3. **Tailor-Made Modules:** Additional applications can be developed as needed, providing flexibility for clients to see specifically desired information.
4. **Real-Time Collaboration:** PinPoint allows for easy, real-time collaboration and data export, streamlining project management.

USER BENEFITS

1. **Efficient Decision-Making:** Real-time project data enables efficient decision-making with accurate information.
2. **Single Source for Data:** Eliminates the need to navigate multiple sources for project-specific data.
3. **Consistent Layout:** Enhances client familiarity with Ulteig tools and enables confidence in the information provided.
4. **Integration with Public Data:** Visualizes project parameters against nationally recognized data sets.
5. **Cost-Effective Workflows:** Enables seamless office and field workflows that save time and money, promoting optimal use of material and labor.
