

CAISO SERVICES: POWERING GRID INTEGRATION SUCCESS

A total pathway to seamless integration — as a CAISO-approved Meter Inspection Company, Ulteig is your premier partner in Power and Renewables Meter and Remote Intelligence Gateway (RIG) engineering. Whether you're embarking on a new interconnection, upgrading an existing resource or ensuring Qualifying Facility (QF) compliance, we bring in-depth knowledge and unmatched capabilities to streamline your journey.

OUR SERVICES INCLUDE:

- Design and Integration
- CAISO Authorized Inspector Services
- RIG Facilitation
- Meter Inspection and Maintenance

CAISO NRI PROCESS MANAGEMENT

SIMPLIFYING COMPLEX REQUIREMENTS

Navigating the CAISO New Resource Implementation (NRI) process doesn't have to be daunting. Ulteig's consulting services are tailored to make your processes seamless and transparent. We guide you through every step, ensuring compliance and timely project completion.

OUR SUPPORT COVERS:

- Project Creation to CAISO Commercial Operation
- Document and Information Management
- RIMS and AIM Management Support
- Schedule Management

COMPREHENSIVE SOLUTIONS FOR YOUR NEEDS

Go beyond the essentials. We offer a range of additional services to meet your specific CAISO requirements. From equipment procurement to load profile data retrieval, we've got you covered.

OUR FULL SPECTRUM OF SERVICES:

- Revenue Meter Design & Integration
- Complex Metering Schemes
- RIG Design & Integration
- RIG Certification Renewals
- NRI Process Management
- Network Infrastructure Support
- QF Conversions
- Equipment Specifications & Procurement
- Site Surveys
- Remote & In-Field Support
- Design Compliance Review
- Milestone & Deliverable Tracking
- Third-party Monitoring System Integration
- Meter Maintenance
- Load Profile Data Retrieval (HHFs)
- Troubleshooting and Repair

SUCCESS STORY: ROSAMOND CENTRAL SUBSTATION

CONNECTED WITH CAISO EXCELLENCE

In 2020, Clearway Energy Group initiated the 192 MW Rosamond Central solar farm project in Rosamond, California. Ulteig, in collaboration with Nor-Cal Controls, played a pivotal role in SCADA integration for the Teddy Rosamond Substation, ensuring compliance with CAISO's stringent regulations.

KEY ACHIEVEMENTS:

- Installation of 14 CAISO meters for seamless grid connection
- Successful deployment of a compliant Remote Intelligent Gateway (RIG)
- Expert consulting and management throughout the NRI process

CONNECT WITH US

For all your CAISO needs and beyond, trust Ulteig with your Power & Renewables projects. We're here to turn your vision into reality.
