

ULTEIG NATURAL GAS SERVICES

Integrated Solutions for Confident Project Execution

UNLOCK EFFICIENCY ACROSS YOUR NATURAL GAS PROJECTS

With many utilities and developers expanding their utilization of Natural Gas to meet growing demand, the energy market is evolving fast. Ulteig combines decades of engineering and energy expertise into an integrated suite of services that helps you reduce risk, optimize resources and accelerate timelines.

WHY ULTEIG?

ONE-STOP EXPERTISE – Studies, Power Services and Field Services coordinated under one roof

DATA-DRIVEN DECISIONS – Actionable insights for operational efficiency and cost-effectiveness

REGULATORY CONFIDENCE – Guidance for NEPA

SCALABLE SOLUTIONS – Tailored services that grow with your energy portfolio

TIME AND COST SAVINGS – Streamlined project execution reduces operational burden

OUR APPROACH

1. ASSESS & ANALYZE

Evaluate generation needs, grid capacity and resource options to identify the most efficient deployment strategies.

2. PLAN & OPTIMIZE

Provide detailed studies, transmission planning and lifecycle cost analysis to support informed decision-making.

3. EXECUTE & SUPPORT

Deliver permitting, NEPA compliance, survey and ROW for seamless project delivery.

APPLICATIONS

- Feasibility studies and resource planning
- Transmission and substation analysis
- Permitting, NEPA and environmental compliance
- Surveying and right-of-way management
- Asset optimization and lifecycle planning
- Grid modernization and operational efficiency

KEY BENEFITS

- **Informed Decision-Making** – Optimize resources and plan repower or expansion strategies confidently
- **Bias-Free Evaluation** – Objective guidance across multiple project variables
- **Reliable, Resilient Outcomes** – Maintain operational efficiency and grid reliability
- **Time and Cost Savings** – Accelerate project timelines with reduced overhead
- **Enhanced Operational Capability** – Coordinate teams and inputs for scalable results

SUCCESS IN ACTION

Ulteig helps clients navigate evolving regulations, growing load demands and complex interconnections while scaling for new opportunities like data center expansion. Our integrated service model ensures projects stay on track, compliant and cost-effective from project conception to completion.
